Data Visualization & BI: Tableau, Power BI, Advanced Excel (PivotTables, Power Query, XLOOKUP / INDEX-MATCH, charts)
Analytics & Statistics: KPI / KRI tracking, dashboard reporting, hypothesis testing, confidence intervals, regression, ANOVA, classification models (logistic regression, Random Forest, XGBoost)
Data Management: Data extraction, cleaning, ETL, root cause analysis, QA / accuracy checks, reporting automation
Tools: Microsoft Excel, Word, Outlook, SharePoint; exposure to SAP, HighRadius, Jesta
Domain Knowledge: Accounts Receivable, Billing, Credit Analysis, Financial Reporting, Claims Processing, Fraud Detection, Regulatory Compliance
Core Strengths: Analytical thinking, problem-solving, attention to detail, written & verbal communication, time management

PROFESSIONAL EXPERIENCE

Accenture Solutions Pvt. Ltd — Hyderabad, India Dec 2022 – Feb 2024
Operations Analyst (Subject Matter Expert)

- Extracted, cleaned, and analyzed large datasets using SQL and Advanced Excel to support compliance and operational decision-making.
- Built and maintained dashboards in Excel and Tableau to track key performance indicators (KPIs) including turnaround time, quality, and productivity.
- Monitored turnaround-time (TAT) metrics and identified anomalies and trends through root cause analysis, helping improve process accuracy and consistency.
- Delivered actionable insights through data visualization and reporting, partnering with cross-functional teams to streamline workflows and strengthen reporting processes.
- Mentored team members on data interpretation, reporting tools, and process adherence; recognized with multiple awards for achieving 100% quality and productivity targets.

HGS (Hinduja Global Solutions) — India Mar 2021 – Oct 2022
Claims Associate

- Processed and evaluated claims, verifying customer details and supporting documentation to ensure accuracy, completeness, and regulatory compliance.
- Performed fraud-detection checks during claims review, flagging discrepancies and escalating suspicious cases to reduce risk exposure.
- Maintained detailed claims reports and documentation aligned to industry regulations, supporting audit readiness and data integrity.
- Prioritized and managed high-volume claim queues, applying analytical judgment to improve turnaround time and service quality.

ACADEMIC PROJECTS

- Global HIV Data Analytics & Visualization (R Shiny, Tableau) — Interactive dashboards on global HIV trends (2009–2023) surfacing high-risk regions and care gaps.
- Air Quality Statistical Analysis (R) — Regression, ANOVA, and chi-square tests on pollutant data (CO, Benzene, NOx) revealing traffic and seasonal patterns.
- Food Insecurity Alert & Assistance App (SQL) — Relational database linking individuals, NGOs, and food banks to streamline distribution reporting.
- Early Disengagement Prediction – TBI Patients (Python) — Logistic regression, Random Forest, and XGBoost forecasting models.
